

## About the Company

NDM Seafood Processors and Exporters Private Limited was incorporated on August 2017 with the aim to set up ultra-modern marine product processing plant under integrated cold chain project. The operation is based on the IQF, blast and block freezing of fish and shrimps for the export market. The company has implemented value addition in the form of IQF with cooking and blanching. It has achieved global recognition for its standards of frozen fish & shrimps through immaculate business process, approved by ISO 9001, ISO 14001 & WBPCB. Its diverse modern mechanism ensures that the finest quality products are delivered through hygienic and eco-friendly processing, packaging, storage and distribution system.

## What does it do?

Frozen foods export sector plays an important role in the economy of India. In recent years developing countries have been more & more involved in adding value to their products. NDM Sea Food endeavors to cater to these needs.

NDM Sea Food is a modern seafood processing company that enjoys its highest advantage by being situated in the heart of the country's shrimp harvesting zone almost overlooking Bay of Bengal. It engages with all stakeholders to continuously improve the living standards of fishermen by systematically ensuring Fair Prices for Shrimp Farmers. It encourages environment-friendly harvesting techniques to ensure that bio-diversity standard is sustained for future generations.

The key operation of the plant would be the value addition of shrimps and other fishes with different exotic flavors from Thailand, Japan and Singapore. The company has set its foot into deep sea trawling and trawler sheathing with its own product (fiber).

## Public Relations

NDM Seafood processors and Exporters Private Limited proud to declare its investment and MOU with

Govt. of West Bengal. They have also received special grant form MOFPI under Govt. of India.

## Opportunity

Endowed with plentiful geographical resources suitable for both marine and inland fisheries (such as a long coastline of 7517 km, abundant rivers and canals, reservoirs, and ponds), India is the second largest fish producer in the world with a production of around 11.4 million MT. The export market is currently valued at USD 4.7 Bn/million MT. Presently, India's marine exports are mostly in the frozen form; however enormous potential exists for exporting value added products.

### Points to be noted

Annual Sales: Startup  
Financial Target: 150 Cr Turnover  
Number of employees: 1000
